

Transversal competencies

Gama builds solar sails, a system of propulsion enabling low-cost deep space transportation.

COMPETENCIES & CAPABILITIES

- Solar sail propulsion
- Navigation in the Solar system
- Large deployable structures in space

GAMMA

PRODUCTS & SERVICES

Gama makes the imaginable possible. Thanks to low-cost, reliable and scalable solar sails, we are redefining deep space access. Designed to meet your mission requirements, our line of spacecraft allow new missions previously considered too expensive or complex to launch.

MAJOR SPACE PROJECTS & REFERENCES

Alpha is the first solar sail of the company Gama. It will be launched in October 2022 at an altitude of 550km and will deploy a solar sail of 110m2.
