 Transversal competencies

OCIS is a French electronics group created in 1981 bringing together three well established SMEs. With over 120 employees, our values are innovation, performance, reliability and responsibility.

The OCIS group clients are large accounts. It operates in mainly six sectors: defense and security, railway, industry and integrators, airports, hotels and telecommunications.

The group exports its products directly to 38 countries, with a strong European presence.

COMPETENCIES & CAPABILITIES

OCIS competencies are:

- electronics and wiring according to specifications,
- communicating terminals,
- test benches,
- connectivity (IoT),
- secure telecommunications, telephony and intercom,
- systems, subsystems, electronic or software bricks, and turnkey solutions.

With an integrated approach always allowing to deliver a high added value to its clients, OCIS group is able to address all type of needs, from subcontracting to original products design and industrialization.

OCIS

PRODUCTS & SERVICES

Electronic manufacturing services (EMS): subcontracting for SMD PCB, assembly of printed circuits, sub-assemblies, wiring.

Original Design Manufacturer (ODM): manufacturing electronic equipment from customer specifications.

Contract Design for Manufacturing (CDM): full design, industrialization and manufacturing of an electronic product.

Service and on-site support.

MAJOR SPACE PROJECTS & REFERENCES

We worked for IAS Orsay by manufacturing an interconnection test card for a European satellite project for Mars, with a non-vacuum degassing constraint (-200 °).

Over the past two years we have produced several stratospheric weather balloon nacelles for the CNRS, three of which have already traveled around the world, with resistance going well beyond what was expected.

We currently deliver to Airbus intercom terminals for satellite repositioning rooms.
