

Transversal competencies

Procureezy

We are a Paris based company dedicated to simplifying and optimizing procurement for space companies. Our platform offers a seamless sourcing experience, helping engineers and procurement teams navigate the complexities of hardware component and supplier selection.

COMPETENCIES & CAPABILITIES

Our expertise lies in understanding the unique challenges of space hardware procurement and addressing them through AI-powered solutions. Our platform is designed to enhance supply chain transparency, streamline sourcing processes, and support critical decision-making for complex engineering needs in the space sector.

PROCUREEZY

PRODUCTS & SERVICES

Our primary offering is an AI-driven procurement platform for space hardware.

The platform includes:

- **Procurement tools:** procurement workflows, purchase requests related features and collaborative tools.
- **Sourcing engine:** an intelligent copilot that assists engineers in identifying suitable suppliers, and provides comparative analyses for components.
- **Internal supplier database:** Additionally, our integrated supplier database enables engineers to access a curated network of space-specific suppliers.

MAJOR SPACE PROJECTS & REFERENCES

We have partnerships agreements with French and European suppliers: Cedrat Technologies, Comat, Exotrail, Spacemanic, Spacrace, Arcsec...
