

Ground segments
Transversal competencies

Exens Group is the merging of high added-value companies: Exens Solutions, AR-Electronique, Bowen Systems.

Exens Group innovates, designs and manufactures radiofrequency, microwave and time-frequency solutions for critical application in highly constrained environments, particularly for defense and space, as well as for medical, energy, transportation and meteorological industries.

COMPETENCIES & CAPABILITIES

Exens Group proposes end to end services to local communities and to institutional customers.

Exens Group is a provider for RF & Microwave engineering solutions from components to the systems.

Exens Group has multi technologies capabilities for RF & microwave solutions.

Exens Group designs and produces best in class equipment and sub systems for defense, military and civilian space applications.

Exens Group has industrial capabilities for manufacturing component to the systems in harsh environment.

EXENS GROUP

PRODUCTS & SERVICES

- Semiconductors & diodes: high power diodes, limiters, diodes switches, mixers
- RF & microwave components: isolators, circulators, duplexers, ferrite switches, multi technologies filters
- RF modules & complex assemblies
- Waveguide equipment: waveguides, couplers, combiners, electromechanical switches
- Oscillators: RF oscillators, multifrequency sources, piezoelectric filters
- Weather radars
- Electronic warfare & defence subsystems
- Qualification and test (TVAC, Multipactor...)

MAJOR SPACE PROJECTS & REFERENCES

Space Agencies: ESA, CNES, ISRO, DLR, JAXA

Major Primes in Satellite & Defense: ARIANE Group, AIRBUS DEFENCE AND SPACE, THALES ALENIA SPACE, THALES, AIRBUS CONSTELLATIONS SATELLITES, MBDA, KONGSBERG, MAXAR, NORTHROP GRUMANN, MDA, MELCO, NEC, OHB, SENER, SSTL.

POINT OF CONTACT

ADDRESS 3 Avenue du Pacifique
ZA Courtabœuf, 91940 Les Ulis - France
