

Transversal competencies

MOSS SAS is a French joint venture established in 2002 by Airbus and Thales.

The company specializes in aerospace defense systems, with particular expertise in Command and Control (C2) solutions.

MOSS SAS supports French military capabilities by delivering high-value engineering, system integration, and operational support services.

COMPETENCIES & CAPABILITIES

- C2 Systems Engineering and Architecture
- Software Development
- Data processing
- Operational Expertise
- Cyber Expertise
- Specialized infrastructures Expertise

In the space sector, these competencies are used to develop operational processing systems for Space Situational Awareness.

MOSS SAS

PRODUCTS & SERVICES

- Accelerate the coherence of C2 systems of systems used by the Air and Space Force (ASF) through a bottom-up approach complementing the top-down approach, combined with a data-centric approach.
- Be the preferred partner of the ASF and the DGA, recognized for its ability to continuously provide its vision on the system evolutions required within the defence programs.
- Provide the ASF with operational space surveillance capabilities to ensure sovereign space domain awareness, the protection of critical space assets, and operational superiority.
- The capability strengthens national strategic autonomy, enhances resilience against space threats, and supports defence authorities with actionable intelligence for secure and sustained space operations.

MAJOR SPACE PROJECTS & REFERENCES

Space Information System : SIS-NEXT

- An advanced system designed to deliver the Space Common Operational Picture to the French Ministry of Defence.
- Leveraging multi-sensor data fusion, high-precision orbital analytics, secure and classified digital infrastructures, and real-time threat assessment, SIS-NEXT provides early warning capabilities, detects hostile intent, and ensures the protection of dual-use and military space assets.
- Fully contributing to the Command and Control Space Operations Center operated by the French Space Command, strengthening sovereign space domain awareness and operational superiority.
