GETELEC
We protect your electronics

With more than 180 000 products in orbit, GETELEC is a benchmark for performance, reliability and stability in the space universe.

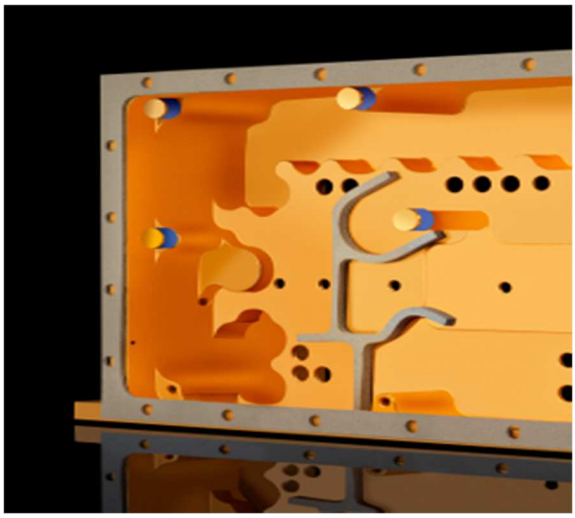

Our innovative bespoke solutions in electromagnetic compatibility (EMC) microwave absorber, technical sealing and thermal management enables rigorous integration from the design stage, eliminating any risk of interference and ensuring optimal operation of each embedded component.

Benefit from a dedicated team of engineers to support you in all stages of your project.

COMPETENCIES & CAPABILITIES

Our production facility is located at our headquarters and is equipped with state-of-the-art machinery to ensure that you receive compliant, high-performance products in a short lead time from prototyping to mass production.

You can also benefit from customized R&D support through GETELEC LAB. We provide material formulation and characterization services to help you improve your material formulations, enhance their performance, and realize your R&D project.

GETELEC

PRODUCTS & SERVICES

All our products are custom-made according to your specifications.

Discover our range of products designed for the aerospace industry, featuring low outgassing rates and low density:

- Conductive elastomers
- Bi-material seals
- Microwave absorbers
- Heat sinks
- Metal shielding

MAJOR SPACE PROJECTS & REFERENCES

Customers references:

- Thales Alenia Space
- Airbus
- MDA
- Syrlinks
- Anywaves
- Swissto12
- Hemeria
