

Satellites
Ground segments
Transversal competencies

Established in 1977, Eutelsat Communications is one of the world's leading and most experienced operators of communications satellites. The company provides capacity on 39 satellites in geostationary orbit to clients that include broadcasters and pay-TV operators, telcos, Internet Service Providers, enterprises and government agencies. Eutelsat's satellites provide ubiquitous coverage of Europe, the Middle, East, Africa, Asia and the Americas.

COMPETENCIES & CAPABILITIES

Eutelsat is an expert in the full satellite operations value chain, with 40 years' experience in the global satellite industry.

Its competence covers regulatory, procurement (space and ground), financial, operational, commercial and innovation activities.

Eutelsat also provides support for third party satellite operators and emerging space-faring nations and carries hosted payloads for government agencies.

EUTELSAT

PRODUCTS & SERVICES

Eutelsat provides capacity for national and international communications (video, data, government, fixed and mobile broadband).

Its fleet of satellites operates in C, Ku and Ka-band frequencies and includes widebeam footprint satellites adapted to video and data broadcasting and High Throughput Satellites and payloads for fixed and mobile broadband.

The company can also provide regulatory support, procurement, training, in-orbit control services and can accommodate hosted payloads.

Products and services for IP markets include Eutelsat CIRRUS, hybrid satellite DTH and OTT delivery solution, and IoT First, a simple and integrated solution that uses Ku-band satellite capacity. More than 1000 transponders on board 38 satellites.

MAJOR SPACE PROJECTS & REFERENCES

Eutelsat collaborates with leading industrial partners that include: Satellites (90% of the Eutelsat satellites provided by European Industry): Airbus, Thales, SSL, Orbital and Boeing.

Launch agencies: Arianespace (50% of the launchships), ILS (Proton), SpaceX, Blue Origin.

We have long-term relationships with national and international launch agencies that include ESA, the CNES, ASI and the UK Space Agency.

A 1000-strong team is capable of pursuing up to seven satellite programmes in parallel.

Some of the multiple innovations driven by Eutelsat include Very High Throughput Satellites, electric propulsion and software-driven satellites.
