

Launchers
Ground segments

Spacedreams design, develops and operates spaceports.

COMPETENCIES & CAPABILITIES

- Spaceports design
- Control benches for launchers
- Launcher operations on ground
- Cryogenic design and operations
- High reliability technologies
- Risk analyses

Spacedreams

PRODUCTS & SERVICES

Spacedreams develops turn-key processes able to operate launchers.

Our main product is the LoxBox, a mobile container capable to masterize all liquid oxygen operations with different launchers and piloted by the launcher itself.

We also develop multiple other Boxes (LH2Box, MethaneBox, etc.).

Ultimately, all boxes may be gathered into a mobile universal pad (mupad).

MAJOR SPACE PROJECTS & REFERENCES

ESA, CNES, Venture Orbital systems, Hybrid Propulsion for Space.
